An insider perspective on the process of technical reviews.

How the new AIAA event model might affect us.

Comments on the Hab Volume Survey by NASA human factors division.

## Poll of the Month

### June 2012 Poll Results

Over half of all survey participants (57.9%) considered that a Lunar/Mars outpost project would be the closest to the "dream" space architecture project that one could hope to work for. It is significantly more popular than other notable options such as interplanetary vehicle, next-gen space station or space hotel.

The result seems to suggest that the dream of building on another world captures the most of our imagination.

If you would like to discuss or comment on this topic, you can start an email discussion thread [here](#).

- Lunar/Mars outpost
- Interplanetary Vehicle
- Next-Gen Space Station
- Space Hotel
- Other

poll counts = 19

### July 2012 Question:

**"As the current SATC Ten Year Plan (2002-2012) is due to expire by the end of this year, what emphasis would you like to see in the next Ten Year Plan?"**

- **Status Quo:** maintain the current level of supports to the major space conferences and organised events.
- **Do More, Try More:** more outreach and crossovers with other space disciplines as well as conventional architecture communities (e.g. AIA, RIBA, and architecture schools). More media/PR exposure.
- **Do Less, but Bigger:** a follow up to Out of this World?, a space architecture design expo? or something else that is bold and ambitious, which could help define and promote the space architecture community.
- **Other**

Credit: Matt McIrvine

While it may be tempting to choose "all of the above" or something similar as an answer. Please consider that an emphasis of all is the equivalent to an emphasis of none. A clear preference would certainly give a more indicative outcome.

[Please answer the poll question here.](#)
